MESSAGE
FROM THE PRESIDENT

Since founded in 1957, Hue University has been well recognized as having a tradition of fondness for culture and education inside the ancient capital of Hue – the biggest hub for human resources in Central Vietnam.

For more than half a century of operation, Hue University has now become one of the leading higher education institutions in Vietnam. Hue University has placed emphasis on providing society with qualified workforce at undergraduate and postgraduate levels, conducting research and technology transfer for national development. Hue University determines to pursue the following objectives:

- Develop current undergraduate and postgraduate training in response to modern and multi-disciplinary trends under the principle of research-based education;
- Speed up strategic research and technology implementation and transfer;
- Foster qualified faculty, staff and leadership that satisfy the demand for improved quality and increased scope of training;
- Increase international collaboration to integrate Hue University into the global higher education system to ensure its position as a regional and worldwide center of cooperation and exchange;
- Invest in modern and systematic facilities and infrastructure.

Hue University wishes to expand and develop international cooperation programs in training, research and student exchange. The University also looks forward to receiving consideration and sharing from domestic and international universities, individuals and organizations in hopes of becoming a research-based university that approaches the ranks of top regional and global universities.

PRESIDENT

[Signature]

Assoc. Prof. Nguyen Van Toan, PhD
Hue University
Formerly known as The University of Hue, Hue University was initially established in 1957. After the reunification of the country in 1975, independent universities were established in Hue on the basis of the existing faculties of The University of Hue. According to the Government Decree No. 30/ND-CP dated 4 April 1994, Hue University has been re-established by reorganizing all Hue-based universities. Hue University is responsible for training students at undergraduate and postgraduate levels, conducting research and applying science and technology in a multitude of disciplines to serve the construction and development of the country in general and Central Vietnam and Western Highlands in particular.

Mission
The mission of Hue University is to contribute to regional and national development, meeting social demand for high quality human resources, and practical and effective products of scientific research and technology transfer.

Vision
By 2020, Hue University will have been:
- One of the top 50 universities in Southeast Asia;
- Upholding regional and national quality standards; and
- An integral part of Central Vietnam’s social infrastructure, and an outstanding higher education institution that exemplifies the essence of Vietnam’s educational system.

Awards
Hue University has been rewarded with many state-level awards for its remarkable achievements, including:
- Independence Medal (third class) in 1998
- Independence Medal (second class) in 2002
- Independence Medal (first class) in 2012

3. Siviculture
4. Land Management

STUDENTS
- More than 45,000 full-time:
  + Gifted high school: 171
  + Junior college: 816
  + Undergraduate: 40,932
  + Master’s: 3,133
  + PhD: 279
  + More than 200 international students

ANNUAL ENROLMENTS
- 12,500 full-time undergraduate
- 3,800 in-service
- 10,500 distance training
- 1,400 Master’s
- 70 Doctoral

STAFF
Total: 3,700
  + Professors, Associate Professors: 189
  + PhD: 469
  + Master’s: 1,184
  + Bachelor’s and others: 1,858

Academic Calendar
- First semester begins in September and ends in January.
- Second semester begins in February and ends in June.
- A two month summer vacation starts in July.
STUDENT REMARKS

Nguyen Thi Thu Giang
The dual bachelor’s degree program in Finance and Banking
"I'm both honored and excited to participate in the program because the program creates an open, friendly and positive learning environment among students and lecturers. I am aware that to be a success in this program, I must study and research as an international student. I do hope that with all my efforts I will complete the course with high results."

Le Chi Cong
Advanced Program, College of Economics
"I really appreciate the teaching quality of the program. I have been taught not only hard skills like technical knowledge of economics but also soft skills such as communication skills, presentation skills, teamwork skills, especially time management skills. Most importantly, the enthusiasm of the well-qualified lecturers from both Sydney University and Hue University has helped me improve myself and integrate quickly into this new circumstance."

Hoang Thi Huong Giang
Advanced Program, College of Economics
"This program gives me a chance to study in Australia right in Vietnam. Studying totally in English is both my big challenge and advantage. At first, it was not easy for me but now my English skills have improved a lot. I am able to hear and understand most class lectures. This is a good premise for my opportunity to study abroad later on."

Nguyen Thi Anh Phuong
Advanced Program, College of Economics
"This program gives me a chance to study in Australia right in Vietnam. Studying totally in English is not only my big challenge but also my advantage. At first, it isn't easy for me but now my English skills have improved a lot. I was able to hear and understand almost class lectures. This is a good premise for my opportunity to study abroad later on."

Nguyen Van Phuc
MA students in Tourism Management - A joint training program with IMC Krems, Austria
"The lectures are full of information and new concepts in tourism, especially with Austrian cases; the study is in combination with practice, field trips, excursions and on-site lectures that can help us release the pressure of hard study. And of course a short-term exchange course in Austria like this can sharpen the knowledge we got from lectures."

RESEARCH & APPLICATION

REMARKABLE FINDINGS OF SCIENCE AND TECHNOLOGY

Activities of science and technology have significantly contributed to the social economic development of the Central region and Highlands in Vietnam thanks to its creation of scientific products which can be applied into production. Indeed, many products have been introduced in the regional and national Techmart such as Linh Chi mushroom production and shrimp production, Ceremic tile information, the Bio-product Betel-Bokashi and other successful products.

In the period 2006-2011, there are 210 subjects and research projects at all different levels related to local issues of the Central region, including 165 subjects done in Thua Thien Hue province. The project results have contributed to the development of the socio-economic orientation of local areas, and the development of the scientific foundation for many specific policies:

1. The study on “research and development of ultrasound - microwave method in ferroelectric and piezoelectric materials synthesis based on PTZ with Nano structure” have developed many following specific products:
   - Manufacturing 01 device for material fabrication by microwave method;
   - Fabricating successfully nano TiO2/SiO2 thin films on tiles with large scale and applied them for waste water treatment;
   - Developing nano silver using microwave method and applied for antibacterial water filter;
   - Improving PZT sol preparation for ferroelectric materials fabrication using microwave method.

2. The study on improving manufacturing technology to product the Bio-produce “Betel-Bokashi” to approach for shrimp safe culture zone in Tam Giang - Cau Hai lagoon system, Thua Thien Hue province has produced a large amount of Betel-Bokashi products for shrimp production.

3. The study on using Gamma knife for treatment of cancer and cranial neuropathy has following outstanding results:
   - Evaluation of the treatment results of brain tumors, brain arteriovenous malformations and body cancers by Gamma knife.

   - Recommendations for treatment indications of brain tumors, brain arteriovenous malformations and body cancers by Gamma knife.

Since September 2005, the Gamma Knife Center has treated 1,340 crania-nerval cases, pituitary tumor (approx 10%), craniopharyngioma (approx 5%), vestibular schwannoma (Acoustic neuroma) (approx 10%), meningitis (approx 10%), Astrocytoma (approx 15%), Glioma (approx 10%), metastatic brain tumor (approx 10%), arteriovenous malformation (approx 15%), recurrent brain tumor (approx 10%), and others (approx 5%). The best effect is arteriovenous malformation, pituitary tumor, vestibular schwannoma (acoustic neuroma). The treatment has good result for head and neck tumor, liver cancer, lung cancer in the early stage (the survival rate after 3 years is about 60%, after 5 years is about 30%). The system improves patients- living quality.
4. The study on "improving productive process of ¾ foreign blood crossbred pigs of Duroc x (Pietrain x Mong Cai) serving development of pig production with high lean meat in Central Vietnam" has finalized the process of pig raising and disease prevention for ¾ foreign blood crossbred pigs of Duroc x (Pietrain x Mong Cai). Besides, this study has developed two sow raising models and two models of raising pigs for meat. Hue University continues enhancing effectiveness and connectivity between scientific research and training with social demand, mobilizing all domestic and international sources for developing and implementing various programs and projects in terms of key science and technology, transferring research products and technical advance for the Central and Highlands region.

Key fields:
- Information Technology and Communication;
- Biotechnology;
- Public Health Protection;
- Resource and Environment;
- Forestry, Agriculture and Aquaculture;
- Social Science and Humanities;
- Mathematics, Physics, Chemistry;
- Agriculture Economics and Rural Development;
- Foreign Studies.

Key studies:
1. Researching the construction of scientific data for restoration, reconstruction and renovation literature and military temples of Hue city on the basis of applying information technology.
3. Studies on Epidemiological features of zoonosis caused by Cryptosporidium parvum in cattle and human and development of rapid diagnostic procedures.
4. Studies on production of recombinant adhesion antigens using for production of diagnostic KIT and vaccine against E.coli in pigs.

5. Improving manufacturing technology to produce the Bio-product "Betel-Bokashi" to approach for shrimp safe culture zone in Tam Giang - Cau Hai lagoon systems, Thua Thien Hue province. Code: 06/2009/HĐ - DADL-NN
6. Improving productive process of 3/4 foreign blood crossbred pigs of Duroc x (Pietrain x Mong Cai) serving development of pig production with high lean meat percentage in central Vietnam.
7. Selection and propagation some root crops (Taro and Yam) with drought tolerance for production in the central coast and Highlands.
HUE UNIVERSITY’S INTERNATIONAL PARTNERSHIPS

Member of:
- ASEA-UNINET (ASEAN-European University Network)
- AUF (University Agency of the Francophonie)
- CLVUN (Cambodia – Laos – Vietnam University Network)

INTERNATIONAL RELATIONS

Hue University has signed hundreds of MOUs with universities and organizations over the world in the following activities:

- Exchange of faculties and academic staff
- Exchange of students
- Exchange of expertise through seminars, conferences, workshops, and other academic activities of mutual interest
- Joint projects for education and research

Of which, 92 MOUs are presently in validity, typically:

- Auckland University of Technology, New Zealand
- Chonbuk University, Korea
- Chungwoon University, Korea
- Ghent University, Belgium
- Hawaii University, USA
- Keidanren & JBAV, Japan
- Khon Kaen University, Thailand
- Kyoto University, Japan
- La Trobe University, Australia
- Mahasarakham University, Thailand
- Marche Polytechnic University, Italy
- Okayama University, Japan
- Sydney University, Australia
- University of Rennes 1, France
- Val de Loire University, France
- Virginia University, USA
- Vienna University of Technology, Austria

Since 2005, Hue University has created and successfully implemented 69 international cooperation projects with the funding amount of millions US dollars. These projects have greatly contributed to Hue University’s training and research activities, as well as to the socio-economic development of Central and wider Vietnam.

These projects are almost all related to key research fields in Hue University, such as agriculture and forestry, economics, education, medicine, environmental science, social science, and so on. Some typical ongoing projects include:

- Developing productive, sustainable and profitable smallholder beef enterprises in Central Vietnam funded by Australian Centre for International Agricultural Research (ACIAR), Australia;
- Climate Change and Rural Institution funded by Danish International Development Agency (DANIDA);
- Promoting preservation and sustainable use of forests in Tay Giang district. Central Vietnam funded by Malteser International, Germany;
- Developing productive, sustainable and profitable smallholder beef enterprises in Central Vietnam funded by Australian Centre for International Agricultural Research (ACIAR);
- Enhancing capacity of ophthalmic training in Hue University College of Medicine and Pharmacy funded by Fred Hollows Foundation, Australia;
- Institutional University Cooperation Program (IUC) funded by VLIU-UOS, Belgium.
JOINT TRAINING PROGRAMS

Hue University began the cooperation with international universities in carrying out joint training programs in 2004. Currently, eight high quality programs at undergraduate and graduate levels are in operation. Namely:

College of Education was established in 1957. Since its establishment, the College of Education has developed to become a quality center of training, scientific research and education. All of its activities focus on developing and maintaining an egalitarian environment in all domains.

Currently, it has 415 staff, including 21 associate professors, 76 PhD’s and 158 Master’s. The annual number of undergraduate and postgraduate students is about 10,000, including all kinds of training programs at its campus and in other locations.

The College began to offer postgraduate courses since 1992. In the process of building and developing, it has gradually improved their number of highly qualified staff. There are 16 majors in undergraduate training programs and 27 majors in Master’s degree training. It also has 6 majors in doctoral training and is preparing all necessary legal and academic formalities to add more doctoral majors.

College of Education has implemented many international cooperation activities, which have created practical results and contributed significantly to the demand for high quality human resources for scientific research and technology transfer. Moreover, it actively seeks and creates favorable conditions for foreign universities and organizations to come and establish long-term and effective cooperation.

Regarding scientific research, College of Education has done many scientific research projects at different levels focusing on three areas including natural science, social sciences and humanities, and education sciences.
College of Economics is a member college under Hue University. Its mission is to train high-quality and professional human resources, conduct scientific research and technology transfer, and provide services in economics and management serving the cause of socio-economic development in the country.

There are 19 majors of undergraduate training in the 4 main fields of Agricultural Economics and Development Studies, Business Administration, Accounting and Finance, Economic Information System and Political Economics; 3 majors of Master's degree training including Agricultural Economics, Business Administration and Political Economics, and 2 majors of Doctoral degree training in Agricultural Economics and Business Administration.

College of Economics’s scientific research activity has led to significant achievements, especially in the principal research areas of Agricultural and Rural development, Small and Medium Enterprise Development, Climate change Adaptation, Marketing and Business Administration, and Development of Economic Information System.

The College has set up cooperation linkages with many foreign universities and institutions in the fields of training, research and project implementation. It has participated in Asian university network for Disaster and Environment Management (AUDEM) and Economics and Environment Program in Southeast Asian (EEPSEA). Currently, the College is running two joint training programs: Bachelor’s degree in Agricultural Economics and Finance collaborating with University of Sydney, Australia and Bachelor’s degree in Finance and Banking collaborating with University of Rennes 1, France. The diversified areas of cooperation have positively contributed to capacity enhancement and training efficiency of the College.
Established in 1957, College of Sciences is a multidisciplinary and multi-field training institution with postgraduate and undergraduate training programs, scientific research and technology transfer in terms of natural sciences, social sciences and humanities, and technology science.

The College currently has 13 faculties, 6 administrative offices and 7 centers, offering 23 undergraduate training programs, 29 Masters programs and 8 Doctoral programs. It also offers 2 majors for technical secondary school and gifted high school in Mathematics, Literature, Chemistry and Biology.

Continuing with 50 years of positive development, the College will work non-stop to improve overall quality, expand the scope of training and scientific research, and offer new training majors in accordance with new technology and its applications.

International cooperation will be further enhanced and strengthened through finding new partners for MOU, conducting joint projects and training programs, transferring technology, and fostering exchanges between students, faculties, and staff.

College of Medicine and Pharmacy was founded on March 28, 1957. The College has become successful in its mission of training, scientific research, medical examination and treatment, and guiding primary health care services. The College has trained over 9,000 medical, pharmaceutical, and undergraduate students as well as nearly 3,000 post-graduate students.

It has four main duties, which are undergraduate and post-graduate training, scientific research and development of international cooperation, medical examination and treatment, and community health.

Undergraduate training: 13 specialties, of which the regular system has 6 specialties (General Doctors, Dentistry, Pharmacy, Bachelor of Nursing, Bachelor of Medical Technology and Bachelor of Public Health) and the in-service training system has 7 specialties (General Doctors, Pharmacy, Bachelor of General Nursing, Bachelor of Midwifery Nursing, Bachelor of Anesthetic Nursing, Bachelor of Medical Testing Technology and Bachelor of Medical Imaging Technology).

Post-graduate training: about 60 specialties, of which Level One Medical Specialization has 22 specialties, Level Two Medical Specialization has 16 specialties, Resident Physician has 6 specialties, Master’s degree has 7 specialties, and PhD has 7 specialties.

Scientific Research and International Relation: the College has completed tens of research projects at national level, nearly 50 topics at ministerial level, and over 1,500 topics at the college level. It has collaboration with over 30 foreign universities and world health organizations. Also, there are 23 international projects on scientific research, medical treatment and public health care.

The College Hospital was established in 2002 as a practical site with 400 sick-beds. Yearly, the Hospital has given examine and treatment for over 200,000 people, conducting surgery for over 2,000 patients, treatment nearly 20,000 patients.
College of Foreign Languages was established in July, 2004. Since 2005, it has maximized its competitive edge by offering new training programs and increasing its enrollment.

The languages offered include English, French, Chinese, Russian, Japanese, Korean and Thai, and training programs range from pedagogy and translation-interpretation to language-culture and tourism. Apart from the traditional language study programs, the College has recently offered programs in International Studies and Vietnamese Studies.

The College's strategic plan for development is to sustain its leading position in foreign language education, human resources development and research; offer training programs and language courses to various learners at all levels; gradually develop into a multidisciplinary, language-based university for the education and training of versatile professionals to serve the construction and development of the country as well as to make an active contribution to Vietnam's renovation and integration into the world.

Through the College's strategic plan for international cooperation in the field of training, many joint programs are offered in collaboration with other universities throughout the world. Such programs recognize that students can obtain high quality education in Vietnam and do not need to spend the entire four years abroad.
College of Agriculture and Forestry (formerly Agricultural University No.II in Ha Bac) was founded in Bac Giang province by Decision 124/CP of the Prime Minister on January 14th, 1967. On August 5, 1983, it was moved to Hue City and merged with College of Agriculture & Forestry and was named Hue Agricultural University No.II. According to Decision No. 30/ND-CP of the Prime Minister on April 4, 1994 on the establishment of Hue University, on April 4 1994, Hue Agricultural University No.II was renamed College of Agriculture and Forestry and became a member of Hue University. Its missions are to conduct undergraduate and graduate training programs in agriculture, forestry, fisheries and rural development to carry out research and to transfer technology in the above-mentioned specializations in the central region and throughout the country.

The College offers 5 college programs, 21 undergraduate programs, 9 Master’s programs and 2 PhD programs. Besides, it also conducts many short training courses on agriculture, forestry, fishery, agricultural extension & rural development and related subjects for local officers and farmers.

By the year 2012, the College will have approximately 20-25 undergraduate programs, 12 Master’s programs and 5 PhD programs, and 80 % lecturers with postgraduate and higher education, proficient in at least one foreign language. The objective of the College is to become the center for high-qualified training, research and developmental activities on agriculture, forestry, and fisheries in the central provinces and the entire country.
Established in 1957, the College of Arts, formerly known as Hue Junior College of Fine Arts, became an affiliated member of Hue University in 1994.

College of Arts - which ranks among the top three major centers in Vietnam for Arts education - is dedicated to training painters, sculptors, designers, and fine art teachers at university level to provide highly qualified personnel for the Central Provinces and Highlands.

Apart from the administrative offices, College of Arts has five departments: Painting, Sculpture, Applied Arts, Fine Art Education and Printmaking, offering Bachelor of Fine Arts in Painting, Sculpture, Applied Arts, Print-Making and Fine Arts Education, and Master of Fine Arts in Visual Arts (joint program with Faculty of Fine and Applied Arts, Mahasarakham University, Thailand). The College provides students with knowledge and creative capabilities based on both its Vietnamese cultural foundation and international art practices.

College of Arts has initiated exchanges with over 50 national and international institutes, universities, cultural organizations, and non-governmental organizations in the fields of education, training, exhibitions, research, arts funding and cultural exchanges, etc.
SCHOOL OF
HOSPITALITY AND TOURISM

Address: 22 Lam Hoang, Hue city
Telephone: +84.543.897.744
Fax: +84.543.897.755

School of Hospitality and Tourism (HAT) is an independent entity under the direct management of Hue University. With the ultimate goal of nurturing the best human resources to lead and guide Vietnam’s rapidly expanding hospitality and tourism industry, the School attaches particular importance to excellence in class room and practical training and innovative research and international cooperative agreements. To achieve these goals, HAT fully utilizes the resources within the School, Hue University and Hue city, which is a major hub for training, research, and cultural and educational exchanges in the Central region of Vietnam.

Located in Hue city, Vietnam’s Festival city as well as the nation’s center of culture and intellectual thought, HAT is situated in an ideal setting for tourism learning and training, which includes on-the-job-training practicums, allowing the learning of theory and practical application. HAT has its own “OJT” Center and enjoys cooperative training agreements with leading organizations and enterprises in the hospitality and tourism industry, thereby providing the best learning environment for the development of both practical and managerial skills. Our motto is Best practices make differences.

Vision
The School aspires to be the best and most prestigious training, research and technology center to meet the increasing demand for high-quality human resources that meet the international service standard in the hospitality and tourism industry.

Mission
The School shall be committed to the education of the students at both undergraduate and graduate levels to equip them with the knowledge, ability, and skills to conduct professional services, scientific research and the transfer of technology with excellence in the hospitality and tourism industry.
The School of Law was established in 2009 after being separated from the Law Department of the College of Sciences according to the Decision No.86, dated 19 August, 2009 by the President of Hue University. Since 1990, the School of Law has educated thousands of undergraduate students, implemented more than 20 projects, and organized many legal services that contribute to training human resources.

The School of Law has the following training programs:
- Bachelor of law.
- Bachelor of economic law.
- Joint postgraduate training courses with national and international universities.

The School of Law has organized many scientific research activities as well as national workshops. Moreover, it has implemented many successful programs such as Law of intellectual property, Law of contracts, Law of PAR, etc. Also, the School of Law has completed more than 25 ministerial and local level projects. Furthermore, it offers legal consultancy level and Clinical Legal Education (CLE), and some short training programs on administrative management, intellectual property, international law and corporate governance. Regarding international cooperation, the School of Law has established cooperation with many international universities and organizations, such as Chiangmai University (Thailand), JICA (Japan), Dadida (Denmark), etc.
Established on March 18th, 2005, the School of Physical Education is an affiliated member of Hue University. Its mission is to train students in Physical Education, National Defense Education and in Teaching Physical Education, offer and manage non-specialized Physical Education course for students of 7 colleges and 3 faculties in Hue University. With 4 administrative offices and 4 departments, School of Physical Education currently has 78 staff members including 52 faculty members and 26 administrative staff.

In the future, the School is determined to become a teacher training center for spots that is as strong as other high-quality sport universities and to work toward international integration.
